

Q. How do cows make Chocolate Milk?

Miss March is trying to eat enough brownies to make chocolate milk. But that won't make her milk chocolaty! We better tell her before she eats all the brownies!

A. Wouldn't it be fun if brown cows made chocolate milk? If that was the case, we think everyone would have a brown cow! However, all cows, brown, white or black give us "white" milk. The chocolate milk comes when someone adds chocolate flavoring to the milk. You can do it yourself with chocolate syrup or a chocolate powder mix or you can purchase it at the store, already made!
